

Waverly Gun Club Internal Text Messaging Policy Effective 4-1-2024

With the increase utilization of text messaging as a primary or secondary source of communication in a variety of usages; personal, business and other activities. The Waverly Gun Club is looking to expand our ability to effectively communicate with it's members in addition to using email as the current and only method of communication. At the February 2024 Membership Meeting it was voted to incorporate text messaging service from Google Email to Text.

The Google texting solution enables us to quickly and cost-effectively send and receive SMS texts and allows us to create a list of our members for a mass or individual(s) issued text message as necessary. However, The Telephone Consumer Protection Act (TCPA) requires that we obtain written approval from our members to either accept the text messaging option or decline them. The cost per mass text is ~ 4.9 cents.

To reduce the usage of text messaging to our members, it was further decided that the usage of text to communicate with members would be limited to the following circumstances:

1. Confirmation to Members on their scheduled work assignment.
2. Renewal reminders for Annual Membership "Safety Sheets" and dues
3. Past due "Annual Dues".
4. Requests by Members for Shift Assignment Replacement Requests.
5. Trap League closure due to weather conditions.

By signing and dating the below confirmation, you either accept or decline the ability to receive text messages from April 1, 2024 to April 1, 2025.

I accept receiving text messages from the Waverly Gun Club
